

Dash from **Friant** is a smart, simple desking system that is easy to specify, install and configure. It has been designed with contemporary finishes and details such as sleek pulls, tapered legs and a hidden trough for convenient power/data access. Its three work surfaces and cabinet laminate options create a striking look in any space. Dash is made with water-based, non-toxic wood finishes and adhesives, and incorporates recycled materials.

Okamura's Pro Unit FW table system offers fully modular solutions for open plan workplaces that blend easily into any environment. Its unique, beamless structure features a minimal center brace for tables up to 3 meters long, increasing legroom and seating capacity. Pro Unit FW is currently available in Neo-Wood Light and Standard White, and in lengths from 1 to 3 meters with single or double-end panels.

The Inscape System from **Inscape Corporation** is a modular furniture collection that offers a truly integrated product solution. Unique and harmonious work environments can be created by mixing and matching components and finishes, while the system's one-frame approach enables thick (3.5-inch) and thin (2.75-inch) panels to be built on the same frame. Shared components such as tiles, work surfaces, connectors and support brackets eliminate redundancy as needs evolve.

Three H has unveiled a series of new components and enhancements for its Create Office Platform, allowing the system to adapt to an even broader range of applications. The enhancements include a new slim-line pull; metal framed, colored glass doors; aluminum-accented under-worksurface paper manager sorters; multiple new wraparound-styled worksurface shapes; and a new wood finish, Mocha Walnut, bringing the total number of finishes to 31.
