

## Task Seating Comparison

Midzone

Zone Classic

**Zone** Our Zone seating line offers affordability without compromising comfort or functionality. Each chair features a contoured seat, elastomeric mesh, and two-way adjustable arms making it the most practical chair in any workspace.

**Vektor** Our goal was to deliver initial comfort without the need for adjustments. Vektor's unique height-adjustable 3D armrests, lumbar support, and breathable mesh back work together to contour to the individual's preference.

**Ignite** Elevating the seating standards, Ignite delivers striking style and extreme functionality. Adjusting tension is effortless with a back tilt lock and tension adjuster. A chrome-plated detail expands the length of the center Y-column, while the lumbar support provides focus for the user.
